Foo *bar*.

Foo *bar*.

Foo *bar*.

With *embedded [brackets]*.

Indented *once*.

Indented *twice*.

Indented *thrice*.

Indented [four][] times.

```
[four]: /url
```

---

this should work

So should *this*.

And *this*.

And *this*.

And *this*.

But not [that] [].

Nor [that][].

Nor [that].

[Something in brackets like *this* should work]

[Same with *this*.]

In this case, *this* points to something else.

Backslashing should suppress [this] and [this].

Here's one where the *link breaks* across lines.

Here's another where the *link breaks* across lines, but with a line-ending space.
